

Outsourcing Mortgage Industry Intelligence Reporting

Strategic Planning and Goal Setting

Performance Monitoring

Compliance Monitoring

Industry Intelligence

Identifying Target and/or Emerging Markets

Not completely satisfied with the capacity, speed, quality, or reliability of your current HMDA/CRA data analysis capabilities?

Have problems that require the analysis of data, but having trouble identifying and/or compiling the necessary data?

Having trouble turning data into information, and then turning that information into useful reports?

Would you like to automate the production and distribution of reports?

We offer three levels of service:

1. We can provide access to our expertise and data via a web-based reporting tool. Reports available at LendingPatterns.com provide an easy, low-cost way to produce reports analyzing the performance of individual lenders, groups of similar lenders, or the entire industry.
2. We can implement custom reports for those with questions that can't be answered via the reports available on LendingPatterns.com. These reports can be reports that you design, or reports that we design for you.
3. We can also design (or replicate), develop and implement customized reports incorporating data from any sources required by your needs.

Let us put our data analysis, report creation, and mortgage industry management expertise to work for you!

ComplianceTech has:

- 15 years of experience analyzing individual lenders' HMDA-LAR submissions for accuracy, completeness, indications of potential lending discrimination, production inefficiencies, indications of under/over performance.
- 10 years of experience analyzing the aggregate industry HMDA-LAR to produce industry intelligence for our clients.
- 10 years developing software, databases, and analytical processes to address the need for informative and cost-effective reporting based on mortgage lending data, population demographics, and housing statistics.
- 10 years as a industry leading innovator in the use of mortgage data (HMDA-LAR, land records, etc.), population demographics, and housing statistics to address:
